8	82.518197	192.168.13.50	192.168.13.60	SNMP	109	get-response	1.3.6.1.2.1.1.5.0

Get-request

```

▼ Simple Network Management Protocol
  version: v2c (1)
  community: public
  ▼ data: get-request (0)
    ▼ get-request
      request-id: 1829432149
      error-status: noError (0)
      error-index: 0
      ▶ variable-bindings: 1 item
      [Response In: 8]

```

Get-response

```

▼ Simple Network Management Protocol
  version: v2c (1)
  community: public
  ▼ data: get-response (2)
    ▼ get-response
      request-id: 1829432149
      error-status: noError (0)
      error-index: 0
      ▶ variable-bindings: 1 item
      [Response To: 7]
      [Time: 0.000977000 seconds]

```

The Request ID in the get-response packet matches the one in the get-request packet.

SNMP Version: v2c

Community String: public

PDU Type: Get-Request: The PDU type is get-request (0) as the client is initiating the request. Get-

Response: The PDU type is get-response (2) because the SNMP agent is responding.

Request ID: 1829432149 (same mean the request and response matched)

Error Status: noError (0) (means success)

Error Index: 0 (indicates no errors)

Variable Bindings (Varbinds): OID (1.3.6.1.2.1.1.5.0).
